Doulton®

Stage 1

CleanSoft™ cartridge reduces temporary hardness in water to prevent limescale build up on kettles and unpleasant film forming on tea.

Stage 2

Ultracarb™ Ceramic filter candle removes particle contamination down to bacterial size and improves the taste and odour of the water by removing chlorine and organic chemicals.

DUO™ System Technical Specifications:

Connections
3/8 inch push fit inlet & outlet suitable for 3/8 inch flexible plastic pipe.

Flow Rate
For optimal efficiency a flow rate of 2 litres per minute is recommended.

Working Temperature Range
Recommended range 5-38°C.

Cartridge Life

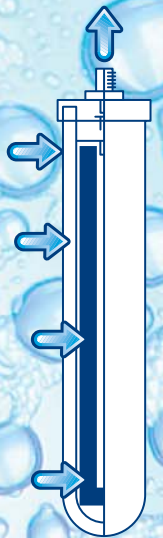

3 months* typical usage before cartridge replacement is required.
